

What can you learn with McPherson?

McPherson is pleased to announce a hands-on learning opportunity during fall 2017. Held at McPherson headquarters in Chelmsford, Massachusetts USA it provides access to vacuum- and purged deep UV spectrophotometers, ancillary laboratory equipment, and knowledgeable instructors. We combine classroom explanations with time running instruments, learning and practicing best operating procedures. This course provides a great way to see what the VUVAS series of instruments can do and help you develop the skills to realize their full potential in your laboratory.

Fall 2017 One day course (certificate)

- Best practice Deep UV Spectrophotometers (purge and vacuum). Tentatively scheduled for October 10 or 11th in Chelmsford MA register today or contact us for information
- Best practice Deep UV Spectrophotometers (purge and vacuum) possibly November 28, 29 or 30 If this is better for your schedule let us know

Tentative Spring 2018 courses:

- Best practice Deep UV Spectrophotometers (purge and vacuum operation)
- Measuring diffraction grating efficiency and polarization response
- Schedules TBA
